Arab Health 2025

Saikang Medical stood out at the 2025 Arab Health Exhibition held at the Dubai World Trade Centre, showcasing its latest medical equipment at booth H8.E30. We presented a range of innovative products, including electric hospital beds, patient transfer trolleys, and dialysis chairs, all praised for their user-friendly design, comfort, and advanced functionality.

The exhibition not only reinforced Saikang Medical's leading position in the global healthcare industry but also opened doors to new market opportunities.

Grateful for the support received, Saikang looks forward to future growth and remains dedicated to delivering high-quality medical solutions that improve lives worldwide.

Saikang Medical Shines at 2025 CMEF with Smart products

On April 11, the 91st CMEF concluded in Shanghai, where Saikang Medical made a strong impression with the official release of its cutting-edge ICU and Surgical Solutions, highlighting the power of “Intelligent Manufacturing in China”.

At the event, Saikang officially launched our new C8c Electric ICU Bed, the Alno X81 Bridge Ceiling Pendant, and the Alno Light 20 Bridge Ceiling Pendant—earning high praise from hospital buyers and industry professionals.

We extend our heartfelt thanks to all the visitors, partners, and friends who visited our booth—your support motivates us to keep moving forward. While CMEF 2025 has come to a close, our pursuit of innovation and global partnerships carries on.

Customer Visiting

Over the past few months, Saikang Medical has had the pleasure of welcoming esteemed customers from around the world. Visitors explored our Global Medical Care Experience Center, gaining insight into our journey of innovation and growth since 2002. They experienced firsthand our core products and overall solutions. Through hands-on interaction and in-depth demonstrations, our guests were impressed by the quality, functionality, and thoughtful design of our offerings.

We sincerely thank all our visitors for their time, trust, and valuable feedback. Your support inspires us to keep pushing boundaries and delivering high-quality healthcare solutions globally.

We look forward to welcoming even more friends in the future as we work together to shape the future of healthcare.

Thanks for **your trust!**

Nicaragua

Medical institution

A leading medical institution in Central America, located in Nicaragua, serves as the region's largest hospital with a capacity of 591 modern beds and state-of-the-art facilities.

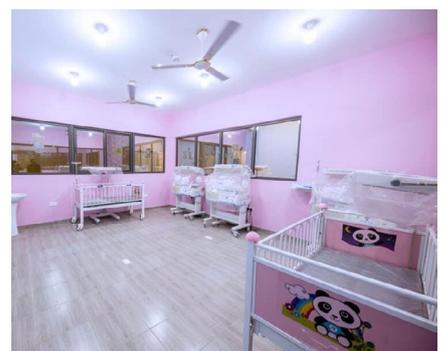

To support its high patient capacity and comprehensive healthcare services, Saikang Medical supplied essential medical equipment and furniture, including hospital beds, dialysis chairs, and medical carts. These additions contributed to an efficient, patient-centered environment, reinforcing the hospital's commitment to quality care.

Ghana

Hospital project

We provided a full range of hospital beds and pediatric beds to a Maternity & Children's Ward in Ghana, supporting their mission to improve maternal and child healthcare services. Our electric hospital beds were selected for their reliability, comfort, and ease of operation—key features that enhance nursing efficiency and patient care in busy clinical settings.

C8c ELECTRIC ICU BED

Integrated multi-function control panel, and touch-screen designed for easier touch. Each touch point has light feedback to avoid misoperation, making it convenient for patients to adjust the basic positions of the bed through the controller.

The bed end is equipped with projection lights, which can respectively project the warnings. These patterns are convenient for the nursing staff to observe the state of the bed and the needs of patients from outside.

*yellow pattern warnings: nurse call, siderail unlocked

*red pattern warnings: brake unlocked

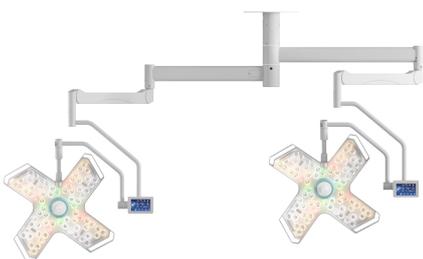

*green pattern warnings: the lowest position, out-of-bed position.

The light features original imported LED lamp beads from OSRAM, Germany, with an average lifespan exceeding 60,000 hours. Each lamp head is equipped with 24 sets of triangular lenses and 72 lamp beads. The use of triangular lenses enables multi-layer light spot superposition, ensuring uniform illumination. It supports assisted voice control through specified wake-up words and command words.
